

## Valve replacement - TS35N

Tools required: TWO (2) wrenches

To uninstall/install, repeat the following for each of the 3 side connectors:

**While holding the brass nut on the valve FIXED** with the first wrench, use the second wrench to loosen/tighten the silver tube nut.

**IMPORTANT:** As you turn the silver tube nut, do not allow the brass nut on the valve to turn, otherwise you may damage the valve box.
